

Internal Audit — Head of Internal Audit Manual

Role: Head of Internal Audit (HIA) **Test account:** w4-cert-hia@certification.invalid
Owns: annual planning, plan approval, resourcing oversight, engagement and plan closure, board / audit committee reporting.

1. Your dashboard

/audit/dashboard

The dashboard reconciles with the database and shows the plan portfolio, active plan progress, engagement states, findings by severity and overdue corrective actions.

HIA dashboard

2. Annual planning

2.1 Build the plan

1. Internal Audit → **Audit Plans** (/audit/audit-plans) → **New Plan**.
2. Enter title and fiscal year. The plan opens in **Draft**.

3. Add engagements. Candidates are proposed from the audit universe and risk ratings — high and critical entities are proposed at a higher audit frequency.
4. For each engagement set the audited department, functions in scope, objectives, scope, planned start / end, lead auditor and team members.
5. Record planning assumptions and constraints (resource days, leave, holidays).

Planning Narrative

Objective

Final full-module acceptance E2E portfolio

Methodology

Risk-based methodology (acceptance run IA-FINAL-E2E-2029-01)

2.2 Resource check before submitting

Cross-check the draft against capacity: - **Workload & Capacity** (/audit/workload) — auditor availability against planned days. - **Auditor Leave** (/audit/leave) — approved leave in the planning window.

2.3 Submit and approve

1. **Submit for Approval** on the plan detail screen. The plan version increments.
2. Internal Audit → **Plan Approval** (/audit/plan-approval) shows the approval queue with Pending / Decided tabs and full approval history.
3. Open the plan, review, then **Approve** or **Return for Revision** with comments.
4. On approval the status becomes **Approved**, the approver and date are stamped, and the plan appears in Active Plan Progress on the dashboard.

Segregation of duties. If you both prepared and approved the plan, the system records a logged SoD exception on the approval action. Have a second approver where your charter requires it.

2.4 Amending an approved plan

Amendments are versioned. Each change records the field, old value, new value, reason and requester. The **Revise Plan** guard in Audit Settings decides whether a revision to an in-flight plan is blocked, warned or allowed. When a plan is superseded you are prompted, per in-flight engagement, to **Carry Forward** or **Suspend**.

3. Risk oversight

- **Risk Matrix** (/audit/risk-matrix) — the likelihood × impact heat map used to justify the plan.
- **Entity Risk Summary** (/audit/entity-summary) — risk position per audited entity.
- **Risk Register** (/audit/risk-register) — the standing register of risks by department and business function.

Risk matrix

4. Monitoring in-flight work

Internal Audit → **Action Centre** (/audit/action-centre).

- **Head of Audit** tab — items escalated to you: overdue responses, overdue high/critical actions, engagements past planned end date.

- **My Audit Work** — anything assigned to you personally.
- **Closure Readiness** — engagements that can be closed and, for those that cannot, the exact blocking items.

Audit	Title	Department	Function	Risk	Status	Closure	What is blocking closure	Actions
ENG-20260615-5179	Test	Administration	Facilities Management	Medium	Planned	2 blocker(s)	- A final audit report must be issued - Quality assurance must be cleared	ⓘ
IT							A final audit report must be issued	

5. Closing an engagement

1. Open the engagement → **Closure** tab.

2. The screen evaluates closure readiness on the server and lists any blockers:
 - o all activities Completed;
 - o no finding left in Draft or Under Review;
 - o every finding carries a management response;
 - o the audit report is **Issued**;
 - o quality review signed off. Corrective actions and follow-ups do **not** block closure.
3. Record the final audit rating and closure remarks.
4. Choose the terminal state:
 - o **Closed** — nothing outstanding.
 - o **Closed – Actions Pending** — closed with open corrective actions, which continue to be monitored in the Action Centre and keep emitting reminders.
5. Confirm. The closure event is written to the timeline and cannot be edited afterwards.

6. Closing the annual plan

1. Internal Audit → **Audit Plans** → open the plan → **Closure** panel.
2. Every engagement in the plan must carry a disposition: | Disposition | Use when | | ———— | ———— | | Closed | The audit finished with nothing outstanding | | Closed – Actions Pending | Finished, corrective actions still

- open | | Cancelled | Not performed — a reason is mandatory | | Carried Forward | Moved into the next fiscal year plan — a reason is mandatory |
- Engagements still sitting untouched at **Planned** block plan closure.
 - Confirm closure. The system generates the closure summary: planned, completed, actions pending, carried forward, cancelled and the completion rate, and creates the lineage link from carried-forward engagements to the successor plan.

Planning Narrative

Executive Summary

The 2027 internal audit plan delivers 22 risk-based engagements covering all 4 Critical and all 18 High residual-risk functions in the audit universe, representing 2,634 planned assurance hours. Coverage is anchored on the 2026 annual risk assessment of 38 active functions across 10 departments and on the approved audit frequency policy (Critical 12 months, High 18 months, Medium 24 months, Low 36 months).

Objective

Provide the Board and Audit Committee with independent, risk-based assurance over the Social Security Board's highest-exposure functions during fiscal year 2027.

Methodology

Risk-based methodology aligned to IIA Standards: annual risk

Closed plan

7. Reporting to the board / audit committee

Internal Audit → **Report Center** (/audit/audit-reports) plus the governed reports:

Report	Route	Answers
Engagement Summary	/audit/reports/engagement-summary	State and outcome of every engagement
Plan Slippage	/audit/reports/plan-slippage	Planned vs actual execution dates
Overdue Actions	/audit/reports/overdue-actions	Ageing of unimplemented corrective actions
Carry-Forward Aging	/audit/reports/carry-forward-aging	How long carried-forward audits have been deferred

Report	Route	Answers
Communication Compliance	/audit/reports/ communication- compliance	Whether every required audit notification was delivered

All reports export to CSV / Excel / PDF, and the plan distribution pack is delivered to the audit committee through the governed communication service with the report attached and checksum-verified.

Document Control — Version History & Change Log

Document owner: Head of Internal Audit **Classification:** Internal

Review cycle: Annually, or on any change to the Internal Audit module.

Version	Date	Author	Summary of change	Approval
1.0	2026-08-30	Internal Audit / Platform Team	First issued manual, generated from the live TEST environment (routes, tabs, governed commands and screenshots).	Reviewed: Lead Auditor. Approved by Head of Internal Audit on: <i>Pending</i>

How to record an update

1. Add a new row at the top of the table for every content change — never edit a released row.
2. Increment the minor version (1.1, 1.2 ...) for clarifications and screenshot refreshes; increment the major version (2.0) when a process, role or gate changes.
3. State the change in business terms (what a reader must now do differently), not file edits.
4. The manual is only “released” once the Head of Internal Audit records an approval date. Until then it is marked *Pending* and must not be used as certification evidence.
5. Re-export the PDF and DOCX from the Internal Audit User Manuals page after each approval.

Change log

Version	Change	Sections affected
