

Internal Audit — Management Respondent Manual

Role: Management Respondent (IA_MANAGEMENT_RESPONDENT) **Test accounts:** w4-cert-mgmt-benefits@certification.invalid, audit.mgmt.benefits@..., audit.mgmt.compliance@..., audit.mgmt.finance@... **Owns:** your department's response to audit findings, the corrective actions arising, and the evidence that they were implemented.

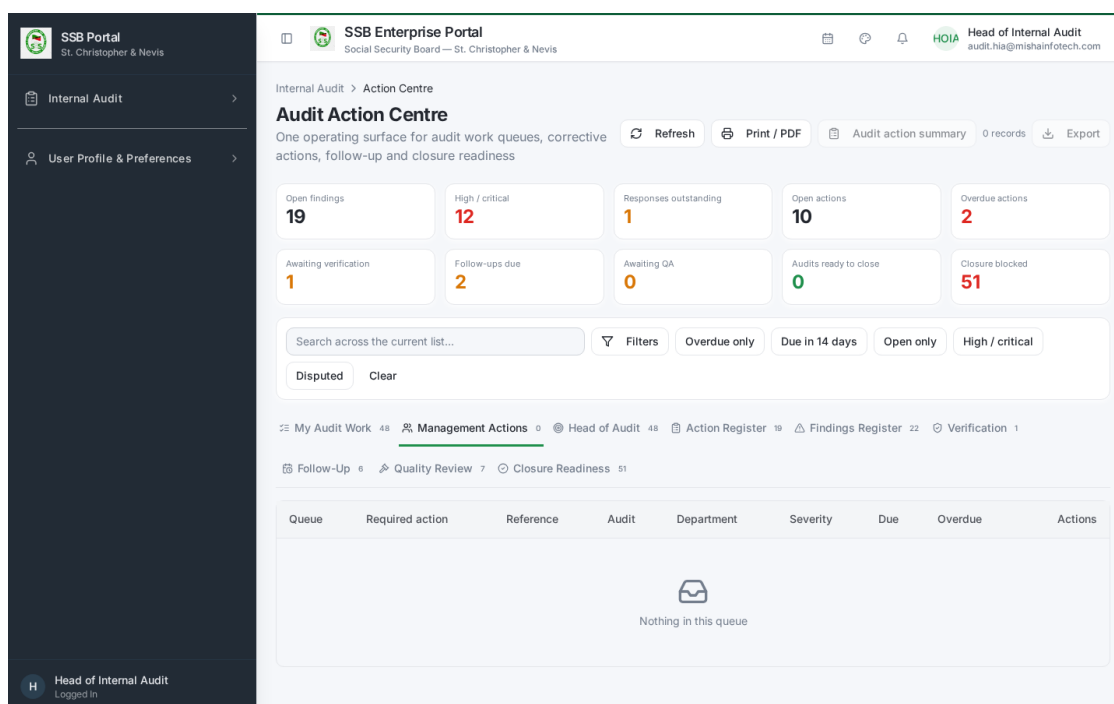

You are not an auditor. Your screens are deliberately limited to your own queues, and you see only findings and actions belonging to your department.

1. Your workspace

Sidebar → **Internal Audit** → **Management Workspace:**

Entry	Route	Purpose
My Work	/audit/action-centre?tab=management	Everything owed by you, oldest first
Findings Register	/audit/action-centre?tab=findings	Findings raised against your department
Corrective Actions	/audit/action-centre?tab=register	Actions you own, with target dates
Follow-Ups	/audit/action-centre?tab=followup	Scheduled verification of your actions

Auditor-only surfaces — Head of Audit, Verification, Quality Review, Closure Readiness — are not shown to you.

Management actions queue

2. Notifications you will receive

All audit communications reach you by email and as in-app notifications:

Event	When
Engagement notification	An audit of your department is launched
Information request	The audit team needs documents or data, with a required-by date
Response required	A finding has been sent to you for a management response
Response reminder	The response deadline is approaching
Action due soon / overdue	A corrective action you own is approaching or past its target date
Escalation	An overdue action is escalated to your senior management
Report issued	The final audit report for your department is available

3. Responding to a finding

1. Open **My Work** and select the finding.
2. Read the condition, criteria, cause, effect and the recommendation, and inspect the linked evidence.
3. Choose your management position:

Position	Meaning	What is required
Accepted	You agree with the finding and the recommendation	An action plan, owner and target date
Partially accepted	You agree in part	State precisely what you accept and what you do not, plus an action plan for the accepted part
Rejected / Disagree	You do not accept the finding	A written rationale with supporting facts. The finding is retained and the disagreement is recorded in the report; the Head of Internal Audit resolves the dispute.

4. Enter the response text, the action plan, the responsible person and the target date, then submit.
5. The response is versioned. If the audit team returns it for clarification, you edit and resubmit — the previous version stays in the record.

The screenshot displays the SSB Enterprise Portal interface. On the left is a dark sidebar with navigation options: Internal Audit, Planning, Execution, Audits, Reporting, Configuration, and User Profile & Preferences. The main content area shows the 'SSB Enterprise Portal' header with the user 'Head of Internal Audit' logged in. Below the header, the breadcrumb trail is 'Internal Audit > Audits > ENG-2027-002 > Benefits - Benefits Payment Processing'. A progress bar at the top indicates the current stage is 'Reporting'. Below this, a summary bar shows 'DEPARTMENT: Benefits (STK)', 'LEAD AUDITOR: W4 Cert Auditor', 'PERIOD: 15/01/2027 - 04/02/2027', 'RISK: Critical', and 'FINDINGS: 3 (3 open)'. The 'Responses' tab is active, showing a table of responses. The first response is for a 'Critical' finding about beneficiary bank details, with a status of 'Accepted' and a date of '28/01/2027'. The second response is for a 'Delayed' finding about quarterly bank detail change log reviews, with a status of 'Finalized' and a date of '28/01/2027'.

Finding	Position	Response	Status	IA Review	By	Date	Actions
Beneficiary bank detail changes processed without signed mandate or supervisor approval Critical	Partially Accepted	Management accepts the control ...	Accepted	Accepted	w4-cert-mgmt-benefits@certification.invalid	28/01/2027	
Quarterly bank detail change log review not	Delayed	Management considers the Q3 re	Finalized	Finalized	w4-cert-mgmt-	28/01/2027	

Management responses

4. Working a corrective action

1. Open **Corrective Actions** and select the action.
2. Move it through its lifecycle as work progresses: **Open → In Progress → Completed (submitted for verification)**.
3. When you submit completion, add a completion note and attach the evidence proving the action was implemented. Evidence is mandatory — a claim without evidence is rejected at verification.
4. You cannot close an action yourself. Internal Audit verifies independently and closes it.

Needing more time

Use **Request extension** on the action, with a reason and a proposed new target date. The extension must be decided by Internal Audit; the original target date and the decision are both retained. Do not simply let an action go overdue — overdue high and critical actions are escalated automatically.

5. Follow-ups

The **Follow-Ups** tab shows when Internal Audit will verify your implemented actions. Have the evidence in place before the follow-up date. If verification fails, the action returns to you with the reason and a revised date.

6. After the audit closes

An engagement can close as **Closed – Actions Pending**. That does not release you: your open actions stay in your queue, keep emitting reminders, and remain subject to verification and escalation until they are verified and closed.

Closed – actions pending

7. Quick answers

Question	Answer
Can I edit a finding?	No. You can dispute it in your response.
Can I close my own action?	No. Internal Audit verifies and closes it.
Can I see another department's findings?	No. Your view is scoped to your department.
Where do I upload evidence?	On the action itself, when submitting completion.
Who resolves a dispute?	The Head of Internal Audit or an independent reviewer.

Document Control — Version History & Change Log

Document owner: Head of Internal Audit **Classification:** Internal

Review cycle: Annually, or on any change to the Internal Audit module.

Version	Date	Author	Summary of change	Approval
1.0	2026-08-30	Internal Audit / Platform Team	First issued manual, generated from the live TEST environment (routes, tabs, governed commands and screenshots).	Reviewed: Lead Auditor. Approved by Head of Internal Audit on: <i>Pending</i>

How to record an update

1. Add a new row at the top of the table for every content change — never edit a released row.
2. Increment the minor version (1.1, 1.2 ...) for clarifications and screenshot refreshes; increment the major version (2.0) when a process, role or gate changes.
3. State the change in business terms (what a reader must now do differently), not file edits.
4. The manual is only “released” once the Head of Internal Audit records an approval date. Until then it is marked *Pending* and must not be used as certification evidence.
5. Re-export the PDF and DOCX from the Internal Audit User Manuals page after each approval.

Change log

Version	Change	Sections affected
1.0	Initial release.	All
