Audit Name	Source	Department / Function	Lead Auditor	Risk	Audit Period	Status	Findings	Actions	Actions
Finance - Accounts Payable	Annual Plan	Finance (STK) Accounts Payable	Audit Team Member One	High	15/01/2029 — 05/02/2029	In Progress	1 open	1 open	
Finance - Payroll Processing	Annual Plan	Finance (STK) Payroll Processing	Lead Auditor	High	08/01/2029 — 29/01/2029	In Progress	1 open	—	
Finance - Accounts Receivable & Collections	Annual Plan	Finance (STK) Accounts Receivable & Collections	Lead Auditor	High	08/04/2029 — 29/04/2029	In Progress	1 open	1 open	

If an engagement does not appear, clear the “Approved plans” filter — engagements whose plan is closed or carried forward are hidden by that filter.

2. Launching the engagement

1. Open the engagement from **Audits**.

2. The **Overview** tab shows the lifecycle stepper, server-derived progress and the recommended next action.
3. **Launch Audit** appears only when you hold the launch entitlement (audit_engagements:launch) and the readiness check passes: plan approved, lead auditor and team assigned, planned dates set, department contactable.
4. Launch is a governed server command. If readiness fails, the panel lists the specific missing items — fix those and retry.
5. On launch the engagement notification is emitted to the audited department through the governed communication service and appears on the Timeline tab.

3. Preparation

Preparation tab: - Confirm objectives and scope with the audited department. - Work the preparation checklist (General / Procedure / Objective / Risk items), assigning items to team members. - Upload preliminary documents supplied by the department. - Record the kick-off meeting.

The stepper only advances to fieldwork once preparation dependencies are satisfied.

The screenshot displays the SSB Enterprise Portal interface. On the left is a dark sidebar with navigation options: Internal Audit, Risk Management, Planning, Execution, Audits, Reporting, Risk Register, and User Profile & Preferences. The main content area is titled 'SSB Enterprise Portal' and shows details for an audit engagement: 'Compliance - Contribution Processing (C3)' with ID 'ENG-2029-003'. The status is 'In Progress' and 'Notification Sent'. A progress bar shows steps: Planning, Approval, Preparation (active), Execution, Findings, Follow-up, Closure, and Reporting. Below this, two alerts are shown: '3 finding(s) have no supporting evidence attached.' and '2 action(s) have no assignee.' A summary bar indicates: DEPARTMENT: Compliance (STK), LEAD AUDITOR: Lead Auditor, PERIOD: 08/04/2029 - 29/04/2029, RISK: Critical, FINDINGS: 3 (3 open). A secondary navigation bar includes tabs like Overview, Preparation (active), Programme / RCM, Activities, Control Tests, Evidence, Working Papers, and Findings. Below this is an 'Audit Checklist' section with a progress bar at 0% assessed. It shows counts: TOTAL 0, COMPLIANT 0, NON-COMPLIANT 0, and PENDING 0. There are buttons for '+ Add Item' and 'Load Template'. At the bottom, it says 'No checklist items'.

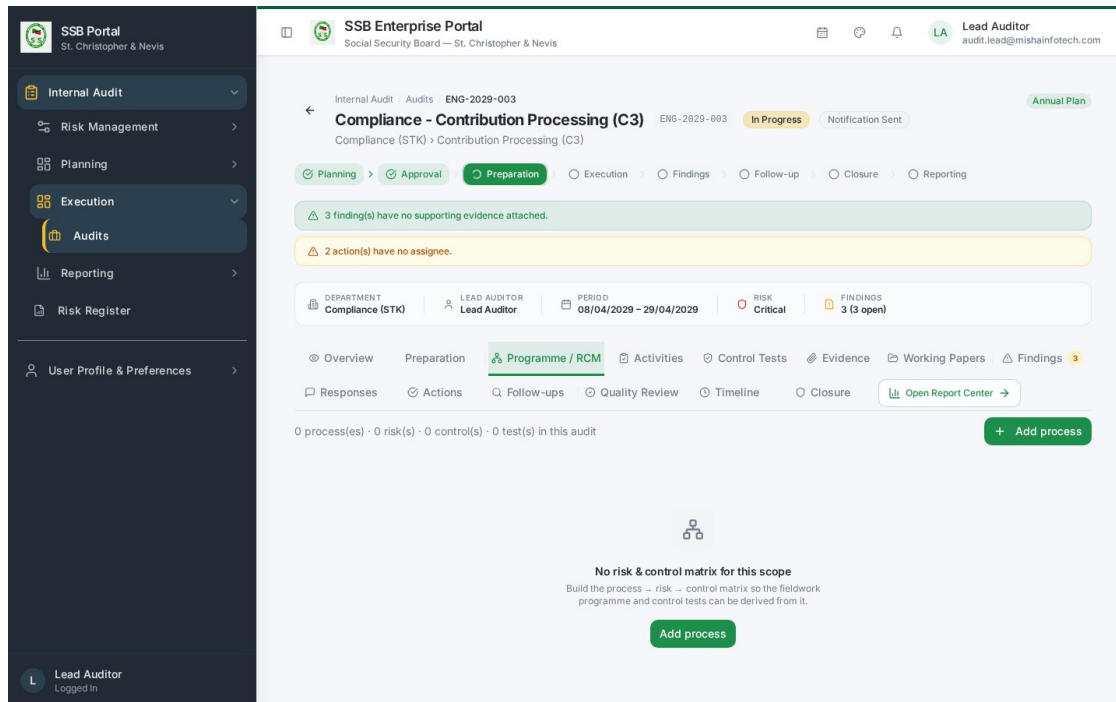

Preparation tab

4. Programme / RCM

Programme tab — build the Risk Control Matrix for the engagement:

Process -> Risk (likelihood x impact = inherent score) -> Control (preventive / detective, frequency, owner) -> Test (procedure, sample basis, expected result)

Every test you define here becomes a testable item on the Control Tests tab. Keep the programme aligned to the risks that justified the audit in the annual plan.

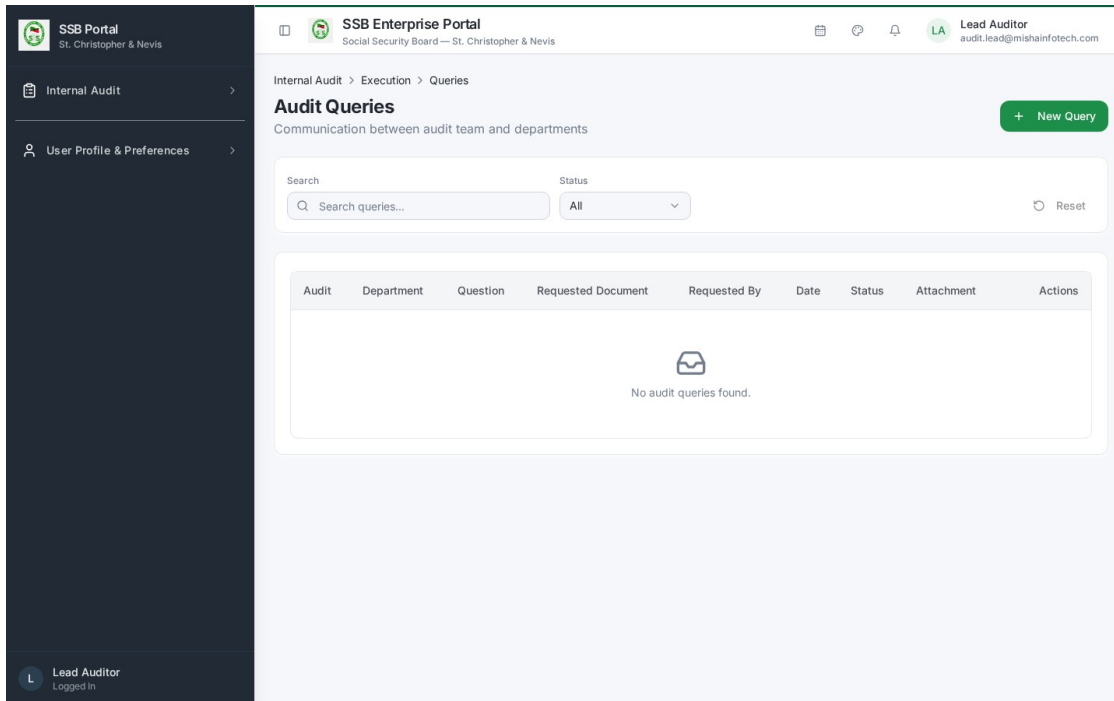

Programme / RCM

5. Information requests

Internal Audit → **Audit Queries** (/audit/queries).

1. Raise a query against the engagement with a description, required-by date and recipient.
2. The request is delivered to the department through the governed communication service; reminders follow automatically as the due date approaches.
3. Record the response and close the query, or escalate if it remains outstanding.

Audit queries

6. Supervising fieldwork

Tab	What you supervise
Activities	Every planned activity has an owner and a completion date
Control Tests	Each test carries a Pass / Fail / Partial result with a rationale
Evidence	Every Fail or Partial has evidence attached
Working Papers	A working paper exists for each significant procedure and is reviewed

Review each item before it is treated as complete. Reviewer sign-off is recorded on the working paper.

Add Control Test

No control tests recorded

Control tests evaluate the design and operating effectiveness of internal controls within the audit scope.

Add Control Test

7. Findings

Findings tab: 1. A finding must state condition, criteria, cause, effect and recommendation, with a severity of Critical / High / Medium / Low. 2. It must be linked to the activity or control test that produced it, and to its evidence. 3. Move the finding from **Draft** to **Under Review**, then to **For Management Response**. Only findings past Draft can be sent for a response, and Draft findings block closure. 4. Add one or more recommendations. Each recommendation can be converted into a tracked corrective action in one click from the Actions tab.

3 finding(s) + New Finding

- F-2027-002-03 Medium Responded
Quarterly bank detail change log review not performed for one quarter
The Q3 2026 quarterly review of the bank detail change log was not evidenced.
- F-2027-002-02 Critical Responded
Beneficiary bank detail changes processed without signed mandate or supervisor approval
6 of 25 sampled bank detail changes had no signed mandate on file and 4 of those were keyed and approved by the same officer.
- F-2027-002-01 High Responded
Benefit payments released to beneficiaries without a current life certificate
9 of 30 sampled beneficiaries were paid during 2026 while their life certificate had lapsed for more than 90 days.

Head of Internal Audit
audit.hia@msishainfotech.com

Findings

8. Management responses

Responses tab shows each finding's response state. You can: - Chase an outstanding response (reminders are emitted automatically); - Review a submitted response and accept it, or return it for clarification — the respondent then resubmits and the version history is preserved; - Escalate a disputed response. A dispute is resolved by the Head of Internal Audit or an independent reviewer, never by you alone.

Responses

9. Report drafting and issuance

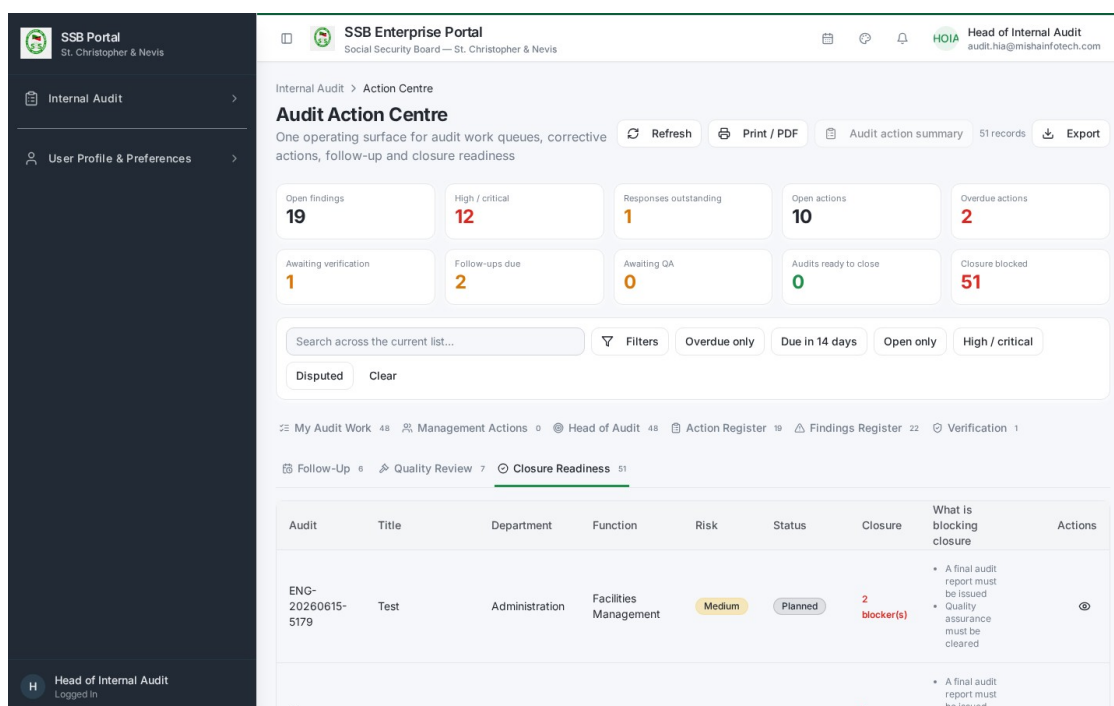

1. **Report Builder** (/audit/report-builder) assembles the report from live engagement data: scope, work performed, findings by severity, management responses, agreed actions and the overall rating.
2. Send the draft to the audited department for factual accuracy comments where your charter requires it.
3. **Issue** the report. Issuance is blocked while quality review is outstanding or in rework.
4. On issuance the report is archived as a generated document and distributed through the governed communication service with the file attached and checksum-verified.

Report builder

10. Handover to closure

Once the report is issued and quality review is satisfactory, the engagement appears in **Action Centre** → **Closure Readiness**. Clear any remaining blockers, then the Head of Internal Audit records the closure decision on the engagement's Closure tab.

Closure readiness

11. Common blockers and what they mean

Message	Cause	Fix
Launch readiness failed	Plan not approved, or no lead auditor / team / dates	Complete the plan entry, reassign, retry
Cannot send for management response	Finding still in Draft	Move the finding to Under Review first
Report issuance blocked	Quality review outstanding or in rework	Ask the Quality Reviewer to conclude
Closure blocked	Activities incomplete, Draft findings, missing responses, report not issued, QA not signed	The Closure tab lists the exact items

Document Control — Version History & Change Log

Document owner: Head of Internal Audit **Classification:** Internal

Review cycle: Annually, or on any change to the Internal Audit module.

Version	Date	Author	Summary of change	Approval
1.0	2026-08-30	Internal Audit / Platform Team	First issued manual, generated from the live TEST environment (routes, tabs, governed commands and screenshots).	Reviewed: Lead Auditor. Approved by Head of Internal Audit on: <i>Pending</i>

How to record an update

1. Add a new row at the top of the table for every content change — never edit a released row.
2. Increment the minor version (1.1, 1.2 ...) for clarifications and screenshot refreshes; increment the major version (2.0) when a process, role or gate changes.
3. State the change in business terms (what a reader must now do differently), not file edits.
4. The manual is only “released” once the Head of Internal Audit records an approval date. Until then it is marked *Pending* and must not be used as certification evidence.
5. Re-export the PDF and DOCX from the Internal Audit User Manuals page after each approval.

Change log

Version	Change	Sections affected
1.0	Initial release.	All
