

Internal Audit — Audit Team Member Manual

Role: Audit Team Member / Auditor (IA_TEAM_MEMBER) **Test account:** w4-cert-auditor@certification.invalid / audit.auditor1@... **Owns:** execution — control testing, evidence, working papers, drafting findings, logging time.

1. Start every day in the Action Centre

/audit/action-centre → **My Audit Work**.

The queue lists everything assigned to you across all engagements: activities to perform, tests to execute, findings to complete, actions you own and follow-ups you must verify. Click any row to jump straight to the right tab of the right engagement.

The screenshot shows the 'SSB Enterprise Portal' for the Social Security Board of St. Christopher & Nevis. The user is logged in as the 'Head of Internal Audit' (audit.hia@mishainfotech.com). The 'Internal Audit > Action Centre' page provides a central hub for audit work. It features a summary of key metrics: 19 Open findings, 12 High/critical, 1 Responses outstanding, 10 Open actions, 2 Overdue actions, 1 Awaiting verification, 2 Follow-ups due, 0 Awaiting QA, 0 Audits ready to close, and 51 Closure blocked. Below these are filters for 'Disputed' and 'Clear', and a search bar. A navigation bar includes 'My Audit Work' (48), 'Management Actions' (0), 'Head of Audit' (48), 'Action Register' (10), 'Findings Register' (22), and 'Verification' (1). A secondary bar shows 'Follow-Up' (6), 'Quality Review' (7), and 'Closure Readiness' (51). The main table lists actions with columns for Required action, Reference, Audit, Department, Stage, Status, Due, Overdue, and Actions. Three rows are visible, all with a status of 'Planned' and due dates in April 2026.

Required action	Reference	Audit	Department	Stage	Status	Due	Overdue	Actions
Complete preparation	IT Department	IT Department	-	Preparation	Submitted	18/03/2026	164d	Ⓢ
Complete preparation	ENG-2026-2027-001	Administration - Asset Management	Administration	Preparation	Planned	19/04/2026	132d	Ⓢ
Complete preparation	ENG-2026-2027-001	Administration - Asset	Administration	Preparation	Planned	19/04/2026	132d	Ⓢ

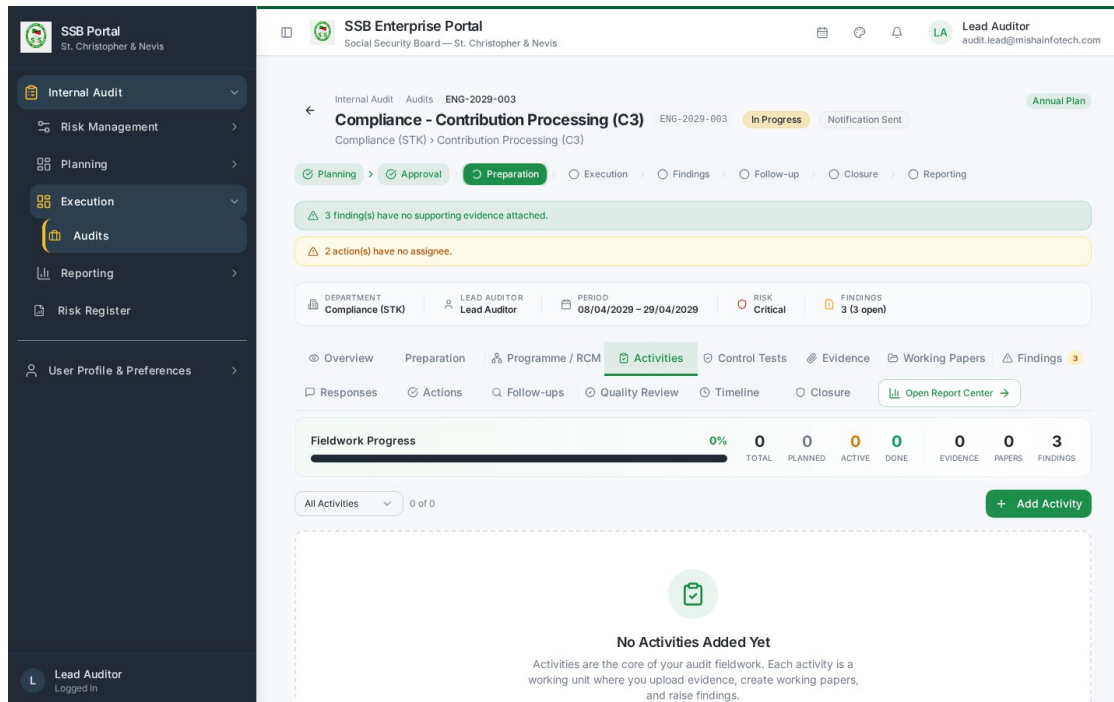

My audit work

2. Opening your engagement

Internal Audit → **Audits** (/audit/audits) → open the engagement. Use the tabs in lifecycle order. The Overview tab tells you which stage the engagement is at and what is recommended next.

3. Performing activities

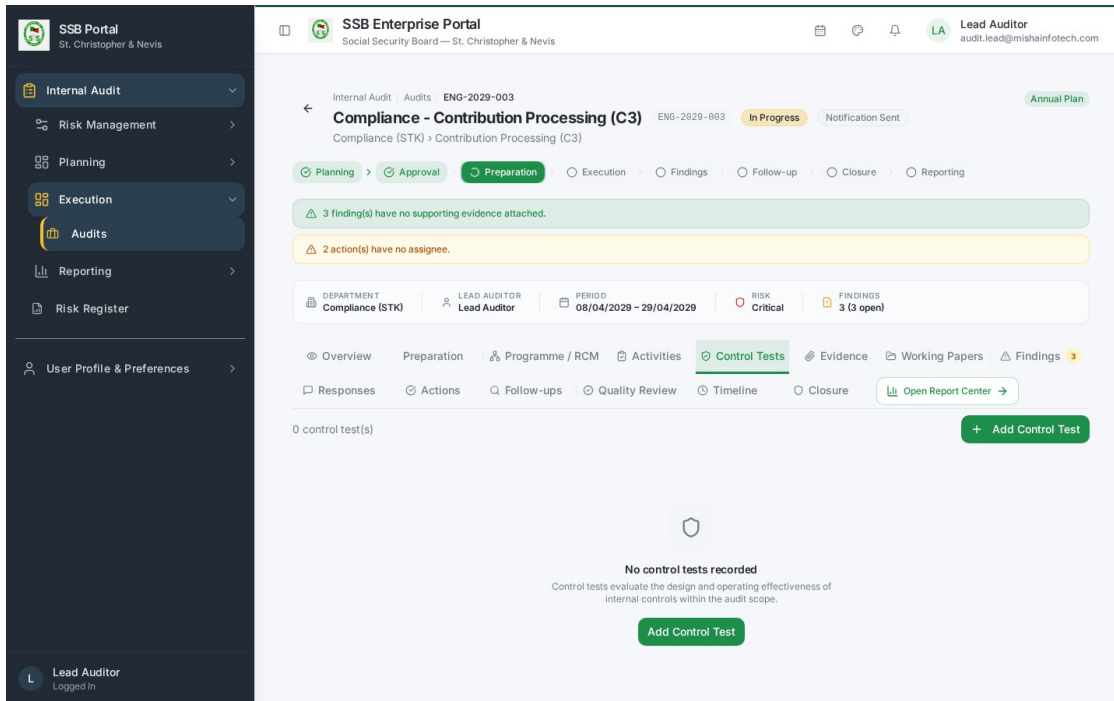

Activities tab: 1. Open the activity assigned to you. 2. Record what you did, the period and population covered and the sample basis. 3. Attach evidence as you go — never at the end. 4. Mark the activity **Completed** only when the work and its evidence are both in place. Incomplete activities block engagement closure.

Activities

4. Control testing

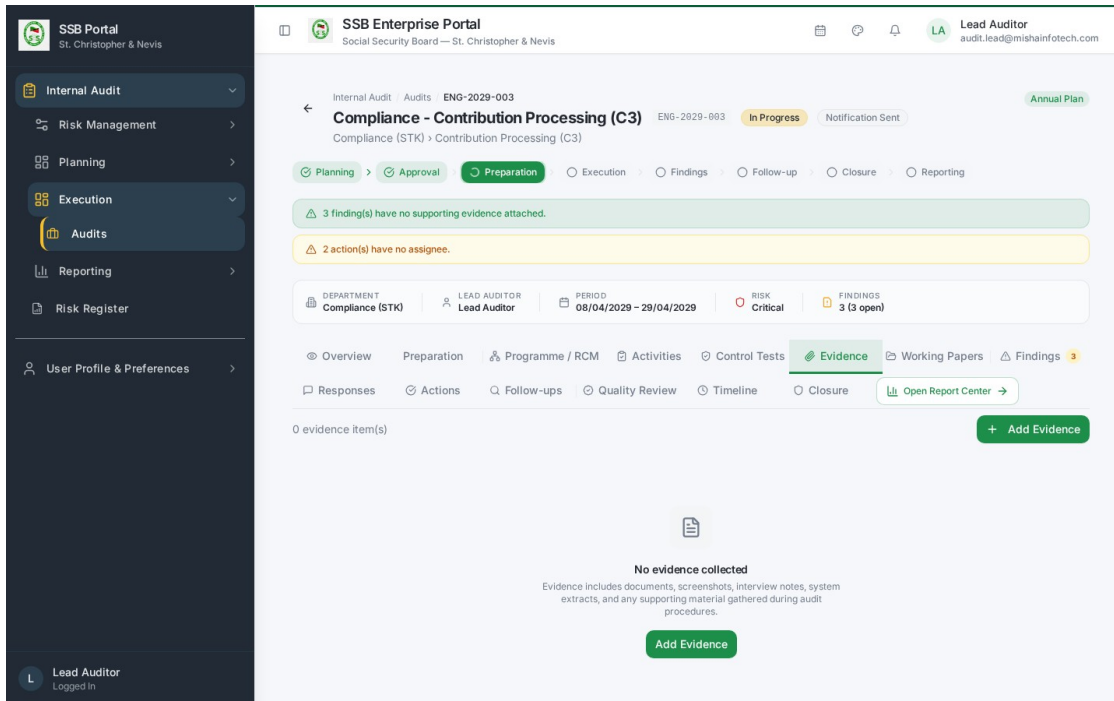

Control Tests tab: 1. Each test comes from the engagement's Risk Control Matrix and states the procedure and the expected result. 2. Record the sample tested, exceptions found, and the result: **Pass**, **Fail** or **Partial**. 3. A Fail or Partial requires a rationale and at least one evidence item; it is normally the origin of a finding.

Control tests

5. Evidence

Evidence tab: 1. **Upload evidence**, then give it a clear name, a description of what it proves, and its source (who provided it and when). 2. Link the evidence to the activity, control test or finding it supports. Unlinked evidence is not part of the audit trail. 3. Evidence files are stored in the governed audit evidence store; every download is logged.

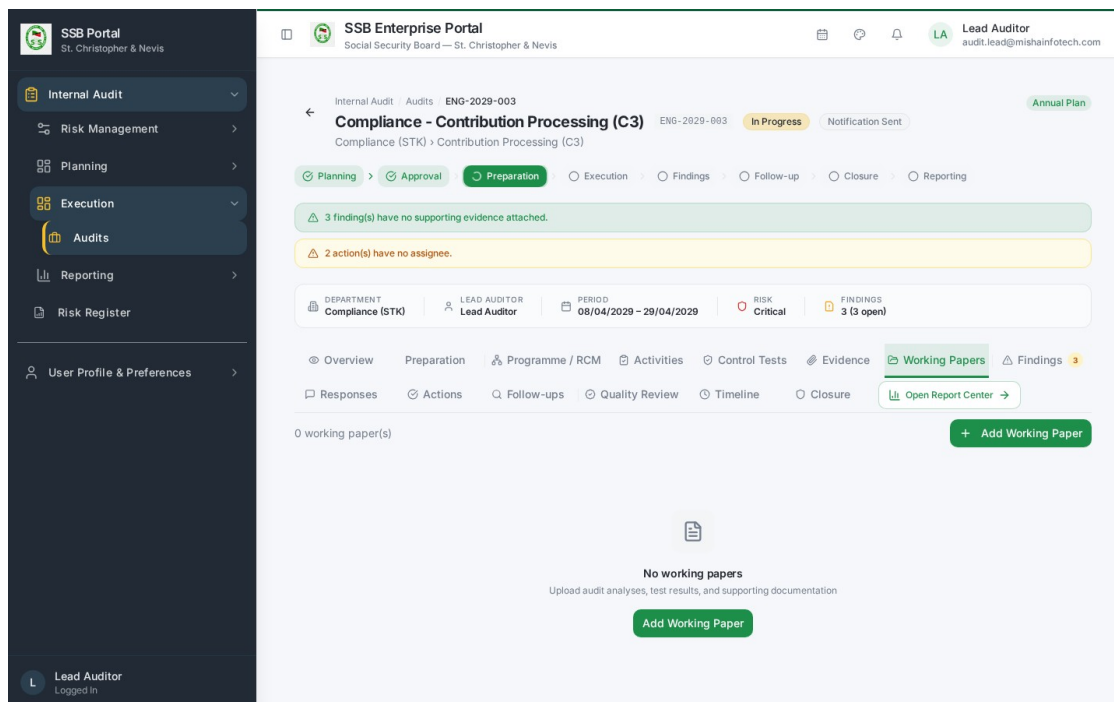

Evidence

6. Working papers

Working Papers tab — one working paper per significant procedure:

Section	What to write
Objective	What the procedure was intended to establish
Work performed	Steps, population, sample and method
Results	What you observed, with references to evidence items
Conclusion	Whether the control objective was met

Submit the paper for review. The Lead Auditor's review sign-off is recorded on the paper.

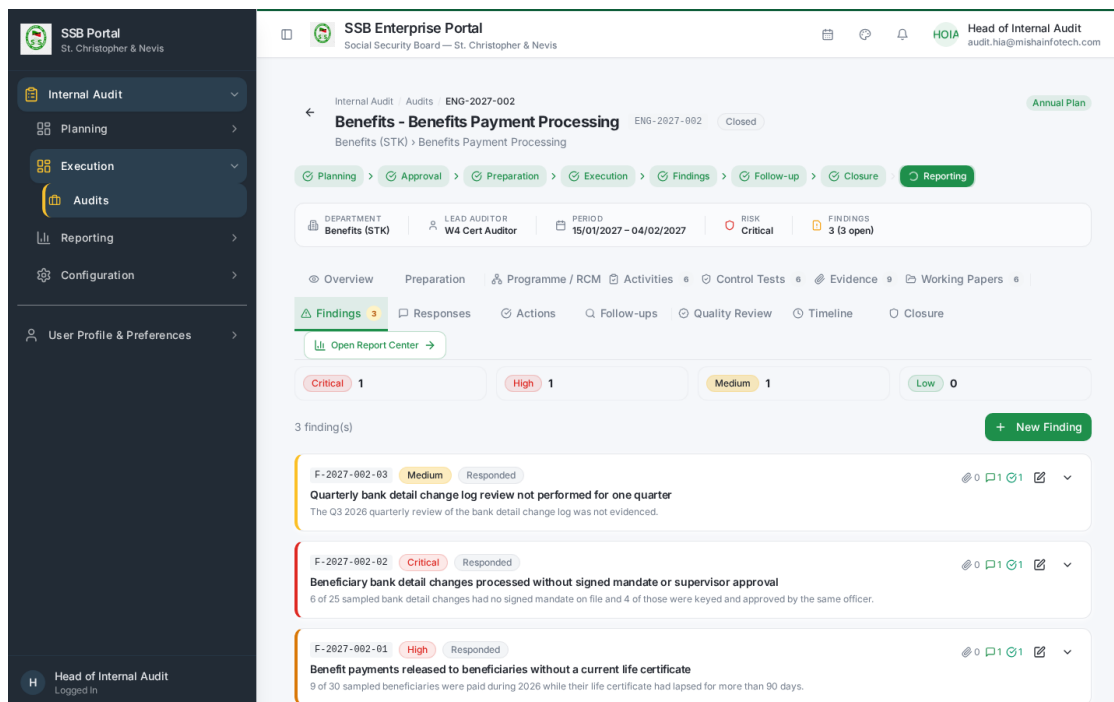

Working papers

7. Raising a finding

Findings tab → **New Finding**:

1. **Title** — short and specific.
2. **Condition** — what is happening.
3. **Criteria** — the policy, regulation or control standard breached.
4. **Cause / root cause** — why it happened.
5. **Effect** — the exposure, quantified where possible.
6. **Severity** — Critical / High / Medium / Low.
7. **Recommendation** — one or more, each actionable and owned by a named position.
8. Link the source activity or control test and the supporting evidence.

Save as **Draft** while you work on it, then move to **Under Review** for the Lead Auditor. Do not leave findings in Draft: Draft findings block engagement closure.

Findings

8. Follow-up verification

When a corrective action owner claims implementation, the item reaches **Action Centre** → **Verification** (audit team only).

1. Open the action and read the owner's completion note and evidence.
2. Test independently — do not accept the owner's assertion alone.
3. Record the outcome: **Verified** (the action then closes) or **Rejected** with the reason, which returns the action to the owner.

9. Time recording

Internal Audit → **Time Tracking** (/audit/time-tracking). Log hours against the engagement and activity daily. Time feeds workload, capacity planning and audit cost reporting.

Time tracking

10. What you cannot do

Action	Who does it
Launch or close an engagement	Lead Auditor / Head of Internal Audit
Approve a finding for issuance	Lead Auditor
Sign off quality review	Quality Reviewer
Approve or close the annual plan	Head of Internal Audit
Change audit configuration or risk settings	Audit Administrator

Controls you are not entitled to use are hidden, not merely disabled.

Document Control — Version History & Change Log

Document owner: Head of Internal Audit **Classification:** Internal
Review cycle: Annually, or on any change to the Internal Audit module.

Version	Date	Author	Summary of change	Reviewed by	Approved by	Approval date
1.0	2026-08-30	Internal Audit / Platform Team	First issued manual, generated from the live TEST environment (routes, tabs, governed commands and screenshots).	Lead Auditor	Head of Internal Audit	<i>Pending</i>

How to record an update

1. Add a new row at the top of the table for every content change — never edit a released row.
2. Increment the minor version (1.1, 1.2 ...) for clarifications and screenshot refreshes; increment the major version (2.0) when a process, role or gate changes.
3. State the change in business terms (what a reader must now do differently), not file edits.
4. The manual is only “released” once the Head of Internal Audit records an approval date. Until then it is marked *Pending* and must not be used as certification evidence.
5. Re-export the PDF and DOCX from the Internal Audit User Manuals page after each approval.

Change log
